The purpose of this seminar is to address and explain the Good Governance principle as one of the most important and most applicable principles of Security Sector Reform (SSR).

The governing of national, regional and local resources, accountability and coordination in drafting and passing laws, managing agencies, public sector actors, civil sector actors and many other elements is what constitutes good governance.

This seminar is to provide necessary knowledge and applied mechanisms of implementation of Good Governance principle proving it as the crucial approach to stability and security, sustainability and development.

The good governance, no matter how complex in its overall reach, can be clearly described as: **the process of decision-making and the process by which decisions are implemented (or not implemented)**. Thus, the aim of the seminar is to focus on the Good Governance concept to officials engaged at various levels and different forms in governing national resources, including drafting and passing laws, planning and executing defence budgets, managing human resources, directing agencies, encouraging civil society actions, leading public sector actors and alike.

This seminar will address origins of the Good Governance principle or approach, aims and means of its implementation and the need for its regular or ad-hock check-ups in order to apply it while preparing decisions which are to affect the general public, specific segments of societies or the use of material resources.

This seminar has been intended for parliament members and parliament committee staffers, military officers (OF4-OF5) and civilian equivalents from ministries of defence and armed forces as well as personnel from ministries of Foreign affairs and the Interior - all primarily engaged in managing material resources, human resources, policy and planning, oversight management as well as in drafting acts covering the mentioned fields.

Participants are invited to actively participate in discussing the importance and applicability of the Good Governance approach in all aspects and segments of a given state and/or society structures.
